Horizontal type double-layer taping machine

The machine is horizontal double-layer wrapping machine(paper tape, aluminum foil)with rotation plate wrapping on the core wire , own single wrapping head . Mainly uses for the electric wire, the strength cable, controls cable and optical cable etc. insulated wire core mica tape wrapping, the fireproof electric wire electric cable mainly is suitable for power plant, airport, ships, high rise construction, subway, underground street and recreation area.

Working principle:

The machine is single head wrapping, A. C. motor passed belt to drive, drive the gear transmission of through the cone gear, make the wrap bobbin left and right direction

to rotation, the core wire passed capstan wheel with single wrap positive and negative rotation, wrap the tape into core wire, realize once wrapping, by adjustment step-less speed changer can be changed speed of capstan wheel to conform different lay of wrap needs. We can produce single head, double head and three head wrapping machine according to customer's need.
